

Hive Honeycomb Creation Process

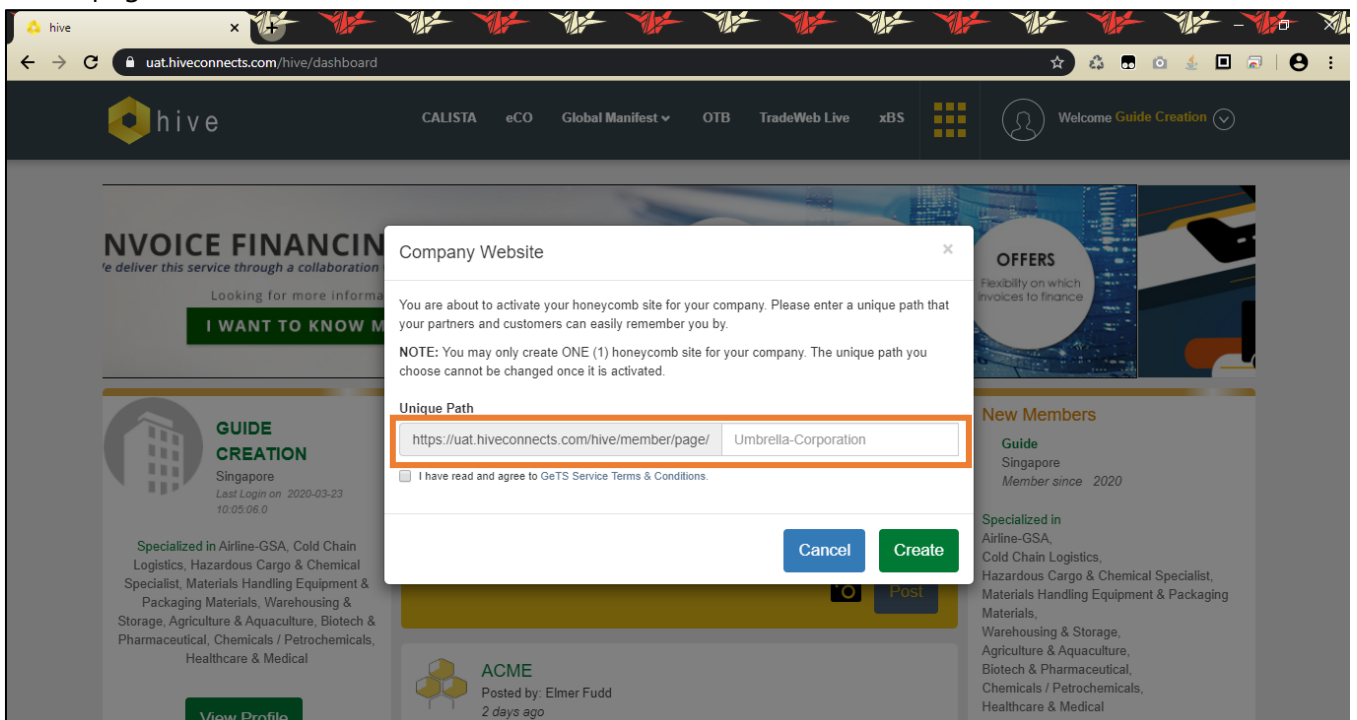

In 4 simple steps, you can have a brand-new homepage specially for your company.

Step 1: Login to your hive user account and click the option "honeycomb".

Step 2: Choose a name for your honeycomb url.

Upon clicking "Honeycomb", a popup will appear for you to key in the unique path of your homepage.

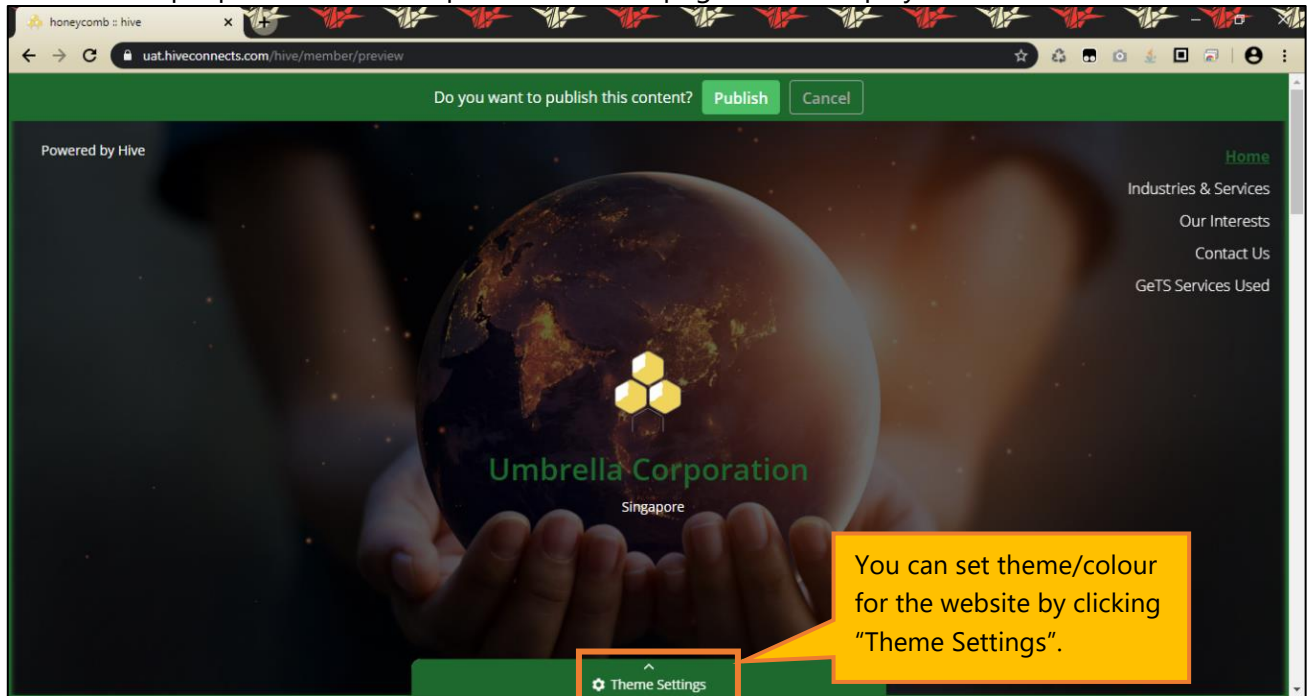

Note:

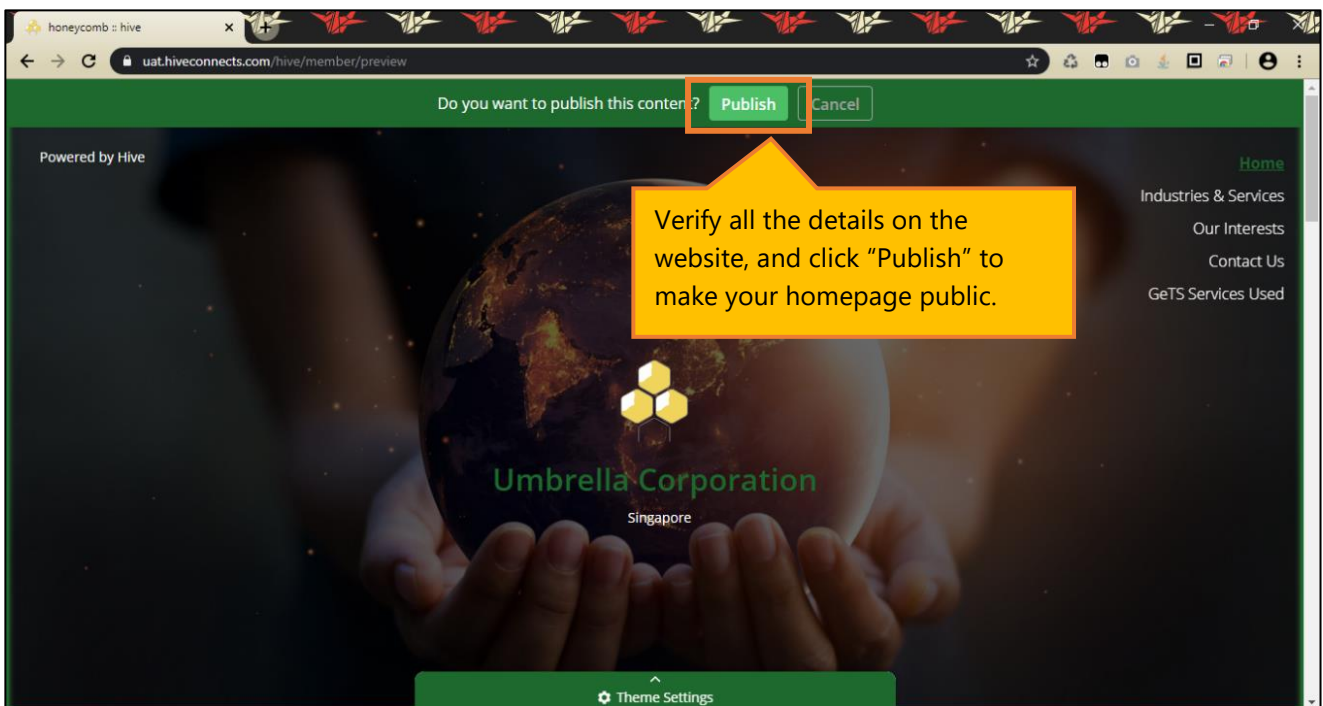

- Please read GeTS Service Terms & Conditions before agreeing.
- Only alphanumeric and ' - _ characters are allowed.
- The path must be unique, i.e. no other company should have the same honeycomb name as yours.

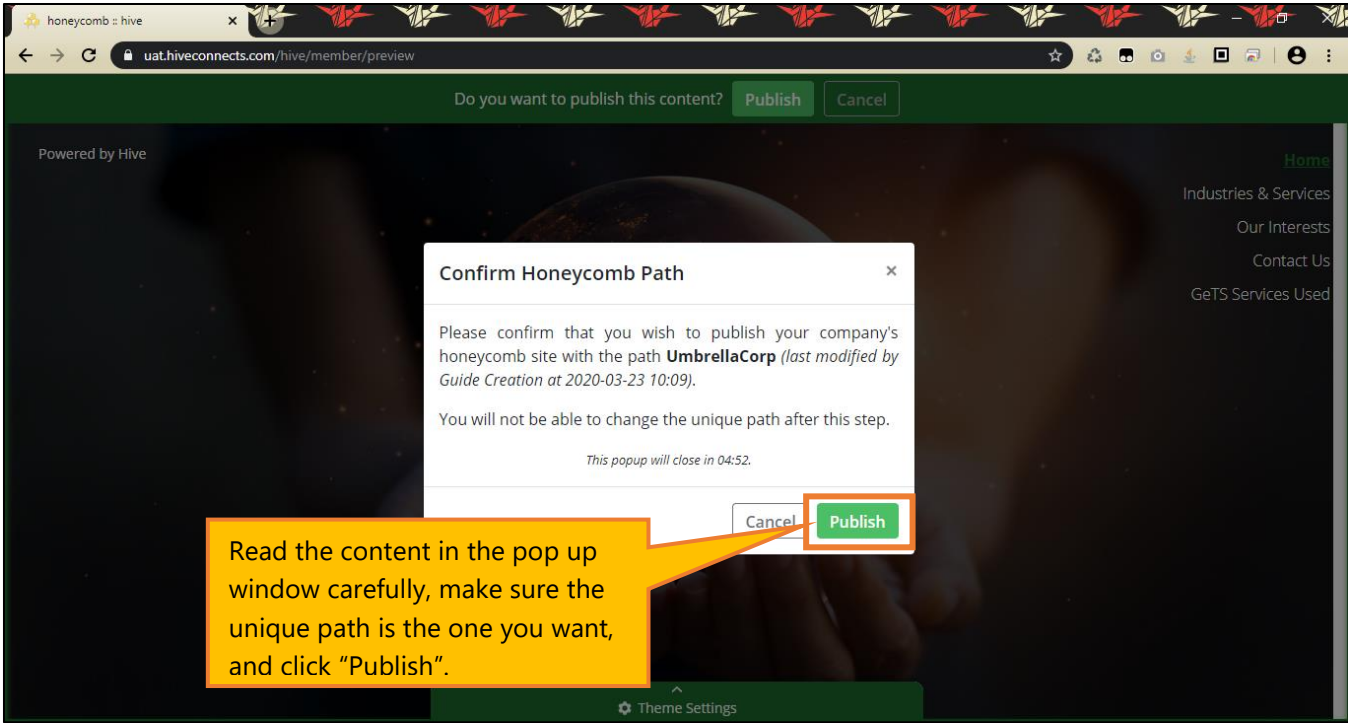

Step 3: Edit your homepage.

After the unique path is created, a preview of homepage will be displayed.

Step 4: Publish the website.

Remark

- Other than your company name, honeycomb also retrieves information from these highlighted sections of the registration form. **Please make sure to key in correct information at the registration stage** – the information will be displayed on the member page.

- Once the honeycomb is published, a post will be created on the dashboard that all hive members can see.

The screenshot shows a post on the Hive dashboard. At the top left is the profile picture of 'Umbrella Corporation', which consists of three yellow hexagons arranged in a triangle. To the right of the profile picture, the name 'Umbrella Corporation' is displayed in green. Below the name, it says 'Posted by: Guide Creation' and '3 minutes ago'. The main text of the post reads: 'Umbrella Corporation just created our own website on hive!' followed by 'Find out more and connect with us at UmbrellaCorp now!'. Below this text is a rectangular box containing a smaller version of the 'UmbrellaCorp' profile picture, the name 'UmbrellaCorp', and the description 'Umbrella Corporation's honeycomb website'. In the bottom right corner of this box, it says 'Powered by hive'. At the bottom left of the post, there are icons for a heart and a speech bubble, both with a '0' next to them, indicating zero likes and zero comments.
